# RESPONDIT - AUDIENCE POLLING / Q & A

Our audience Q&A and polling system, RespondIT, allows event managers and presenters to ask questions and poll their audience pre, during and post-event. Participants can respond or ask their own questions by simply using their mobile phones and wireless devices.

We provide maximum audience engagement, minimal expense and supreme ease of use and implementation. No elaborate hardware required, with instantaneous results.

Using SMS technology and web based interactive devices, RespondIT is so interactive that your audiences can not only use it to ask questions that are shown live on-screen during your event, it can instantly show responses to polls live on-screen.

RespondIT key benefits include:

- Your audience already has the technology required
- Replaces the need for costly hardware distribution to your audience
- Unparalleled audience interactivity with your questions
- More than just multiple choice
- Can be integrated across multiple rooms, cities, or internationally, even via live Webcast
- Feeds analytics directly into Excel

RespondIT
