WEBCASTING LIVE AND ON-DEMAND

Webcasting is the future of events on a global scale, allowing you to reach a larger audience than ever before with a live or on-demand service.

Our team produces engaging, real-time webcasts that you can stream to audience members around the globe or turn them into core training & knowledge management tools. Accessible anytime. Anywhere. From any device.

Our Webcasting features include:

- Quality rich media experience through automatic synchronisation of audio, video and graphics, and native resolution images
- No more blurry charts, spreadsheets or text
- Interactivity with Q&A and polling
- Live and on-demand webcasts to audiences large or small
- Mobile playback support for iPads, iPhones, Blackberry, Android and other mobile devices
- Content accessibility via screen readers and closed captioning
- Enhanced search metadata, characters within slides and even speech-to-text audio
- Catalogue all your presentations/webcasts in one place
- Secure login to webcasts with registration pages and password protection
- Report extensively on your presentations and its viewers through included data analytics

Secure. Live. Interactive. On-demand.
